PERMEABLE PAVER AGGREGATE

WWW.KAFKAGRANITE.COM

PERMEABLE PAVER JOINT FILLING AGGREGATE

Kafka Granite LLC produces over 40 different types of crushed granite, quartz, and marble aggregate for use as decorative joint filling between permeable pavers. Our wide variety of natural and recycled materials gives you the option to perfectly accent your project with a decorative aggregate.

Our granite and quartz aggregates are extremely hard materials, easily withstanding the rigors of freeze/thaw cycles. They will not break down and clog your runoff system over time like softer aggregates, ensuring maximum drainage for many years to come.

These natural stone materials are available in 50lb bags, super sacks, and bulk quantities. They can be crushed to a variety of sizes to fit your needs. Call today for more information or samples.

NEW! BAGGED PERMEABLE PAVER AGGREGATE

We are now stocking 6 of our most popular colors of permeable paver jointing aggregate in convenient 50lb bags, ready for immediate delivery. Choose from natural stone colors Carmel, Starlite Black, Platinum, Cherry Creek and Colonial Red. Or, gain even more **LEED** points with Recycled Porcelain Aggregate, which is crushed from re-claimed landfilled toilets. All of these materials are hard and durable, ensuring they will compliment the design of your permeable paver installation and provide drainage for years to come.

GO TOTALLY GREEN WITH RECYCLED PORCELAIN AGGREGATE

Each year, manufacturers landfill thousands of tons of flawed toilets. Kafka Granite is helping to eliminate that amount by removing landfilled toilets and crushing them into beautiful Recycled Porcelain Aggregate.

Our Recycled Porcelain Aggregate is as hard as our granite aggregates, but has zero moisture absorption, completely eliminating all of the effects of the freeze/thaw cycle. In addition, using this re-claimed and recycled material will increase the **LEED** points earned on your project.

Recycled Porcelain Aggregate is available in 50lb bags, super sacks, and bulk quantities. It can also be crushed to a variety of sizes for use in Architectural Precast Concrete, Epoxy Resin flooring & tiles, and a variety of other applications.

Project: Elmhurst College **Location:** Elmhurst, IL **Material:** Pewter Granite

Kafka Granite is a family owned and operated company that was started in 1979 by Glenn Kafka. From our origin as a supplier of decomposed granite road material, we have grown into one of the largest manufacturers of specialty aggregates and landscape stone in the United States. Our aggregates have been used for architectural precast concrete, terrazzo tile & flooring, epoxy resin tile, and many other applications world wide.

Our goal is to provide our customers with a consistent, high quality stone product and to ensure the delivery of our products in a timely manner.
