

PRODUCERS OF ARCHITECTURAL AND LANDSCAPE AGGREGATES

Epoxy Overlay Aggregates

Kafka Granite produces over 40 different types of crushed granite, quartz, and recycled aggregates for use with epoxy overlays. Our aggregates have been used in overlays of road surfaces, pedestrian walkways, rooftops, and many other applications where a hard stone that won't break down over time is necessary.

APPLICATION | High Friction Overpass Overlay
COLOR | Platinum Granite
LOCATION | Marathon County, Wisconsin
INSTALLER | Marathon County Highway Department

STREETSCAPE | *Enhance your hardscape.*

With the streetscape application, any preexisting hardscape sidewalk, trail, or pathway can be quickly and easily enhanced while also increasing traction. With over 40 different colors of granite, quartz, pebbles, and recycled materials available for use in epoxy overlay streetscape applications, this aggregate is both aesthetically pleasing and practical. The streetscape application greatly increases traction, warranting a non-slip surface for pedestrians. Our granite, quartz, pebbles, and recycled materials are extremely hard aggregates and easily withstand rigorous elements, ensuring a beautiful, high traction surface that won't break down over time.

Kafka Granite's streetscape aggregates can be quickly and easily adhered to any preexisting concrete surface using a two-part epoxy. After any preexisting cracks have been filled and the surface has been thoroughly cleaned, the epoxy is spread evenly on the surface and the aggregate is dispersed. Once the epoxy is cured, the excess stone is swept away and can be reused.

HIGH-FRICTION SURFACING | *Increase traction. Reduce accidents.*

The driving conditions of any preexisting roadway, bridge deck, overpass, exit/entrance ramp, or curve can be quickly and easily improved with Kafka Granite's high friction surfacing aggregates. The high friction surfacing application greatly increases traction year round and helps trap road salt during the winter, making the deicing process more efficient and effective. Kafka Granite's extremely hard high friction surfacing aggregates easily endure the freeze/thaw cycle, snow plowing, and other rigorous conditions. In addition, our various colors can be utilized for drivers to easily distinguish the road from bike paths, crosswalks, and other pedestrian walkways.

Kafka Granite's high friction surfacing aggregates can be manufactured to meet Department of Transportation specifications. After any cracks in the preexisting roadway are filled and the surface is thoroughly cleaned, a two-part epoxy is evenly spread and the aggregate is dispersed. After the epoxy is cured, the excess aggregate is swept away and can be reused.

*Marbles are available but not recommended for these applications.
Please see www.kafkagranite.com for more information.*

**Also available in fractured granite*

WHITE ROOF | *White is the new green.*

Kafka Granite specially produces Recycled Porcelain, White Quartz, and naturally round Birchwood Granite in a variety of sizes suitable for use in several application techniques of white roof coating. Kafka Granite's white roof crushed aggregates, manufactured sands, and round pebbles can be quickly and easily applied to any preexisting rooftop using a two-part epoxy. Birchwood is also available in 1 1/2" for traditional roof ballast applications. White roofs, also known as cool roofs, greatly reduce the amount of heat absorbed by roofing materials from the sun, therefore reducing the heat island effect. While White Quartz is our brightest white and Birchwood is the whitest round stone available, our Recycled Porcelain can help further increase the LEED points earned on your project.

APPLICATION | High Friction Horizontal Curve Overlay
COLOR | Platinum Granite & Colonial Red Granite
LOCATION | Bergen County, New Jersey
INSTALLER | Statewide Striping Corporation

APPLICATION | High Friction Bridge Deck Overlay
COLOR | Colonial Red Granite
LOCATION | Oradell, New Jersey
INSTALLER | Statewide Striping Corporation

KAFKA GRANITE, LLC | is a family owned and operated company that was started in 1979 by Glenn Kafka. With over sixty colors of natural stone and recycled products, Kafka Granite has grown into one of the largest manufacturers and suppliers of specialty aggregates in the United States. Kafka Granite's architectural aggregates, manufactured sands, decomposed granite, and boulders are used for many applications including architectural precast concrete, terrazzo flooring, epoxy resin tile, epoxy overlays, pathway materials, ballyard materials, landscape stone, and more.
