

# EROSION RESISTANT DUSTLESS EASY TO INSTALL MAINTENANCE FREE

## Natural Crushed Stone Pathway Materials

---

Kafka Granite's Wax Polymer Pathway Mix is a unique alternative to pavement that offers a natural looking, yet completely sealed surface. The wax-coated aggregate eliminates mud, dust, and erosion. This unique mixture provides a solution for steep slopes, high winds, and heavy rains that is easy to install and maintain.

## WAX POLYMER PATHWAY MIX COLOR OPTIONS

**AUTUMN BLEND** Marble

**BEIGE BLEND** Marble

**MIDNIGHT BLUE** Granite

**PLATINUM** Granite

**RUSTIC** Granite

**TWILIGHT BLACK** Granite

## **SUPER FANS** WHAT THE CGCS ARE SAYING:

“Over the years Erin Hills has tried an array of products for our undulating walk paths. The wax polymer and stabilized crushed granite from Kafka Granite provides a superior combination of ease of installation, durability, limited maintenance, and great aesthetics”.

**Zachary Reineking** CGCS

Director of Course Maintenance, Erin Hills

“Kafka Granite’s pathway product has not only exceeded our expectations with handling, installation and its ease to work with, but the integrity of the product and its ability to withstand the demand of both cart and foot traffic has been excellent. Also, with record breaking rainfall this past year in our area, the product never eroded once. The membership at Loch Lloyd has loved the look and how it naturally blends to the areas where applications have been made. With proper installation, I don’t think you can go wrong. We’ve been very happy thus far and plan to continue its use.”

**Jeff Steen** CGCS

Director of Golf Course Maintenance, The Country Club at Loch Lloyd
