NATURAL THIN STONE VENEER
INTRODUCING KAFKA GRANITE’S NATURAL THIN STONE VENEER

Derived from our various quarries throughout North America and made with the same care and attention to detail as other Kafka products, this new line of thin stone veneer is comprised of stunning natural stone that can be used for nearly any application, spanning from building facades to interior features.
STANDARD PATHWAY MIX
KAFKA’S DIVERSE AND EXCLUSIVE RANGE OF GRANITE, MARBLE, AND QUARTZITE

is a refreshing offering of classic colors that feel familiar and are easily embraced by architects, masons, and property owners. With a large network of quarries, you can expect to see additional colors in the future.
BECAUSE KAFKA ONLY PRODUCES AUTHENTIC STONE PRODUCT,

the natural colors of our Granite, Quartzite and Marble exist through the entire stone. Kafka Natural Thin Stone Veneer wears and weathers naturally and maintains its integrity through the life of your project.
THE LIGHTWEIGHT PIECES HELP REDUCE PRODUCTION, SHIPPING, AND CONSTRUCTIONS COSTS.

With a nominal thickness of ¾” to 1 ½” the natural stone product weighs 15lbs or less per square foot. Kafka Thin Stone Veneer can be installed without footings or ledges and adheres to concrete, plywood, paneling, drywall, and even metal.
INSTALLATION

To ensure the integrity and longevity of a project, we recommend that a professional mason install our natural thin stone veneer. If this specialty building product is being utilized in an exterior project, the area that will be in contact with the product must first be waterproofed to industry standards. Next, any chemical film on the wall should be removed. Additional surface preparation may be necessary, depending on the type of material. Some surfaces will need a non-corrosive wire lath and a setting mix before the material is applied. To set the product, begin with any corner pieces and alternate long and short ends while stacking them on top of each other. Type N or S mortar is suitable for most projects, possibly with the addition of a bonding admixture. Once the corners are complete, the rest of the pattern can be filled in by pressing each stone against the scratch coat wall. Mortar should be allowed to ooze and create grout joints around the edge of each stone.

ASHLAR CUT

Ashlar Cut
Length: 4” – 30’ Random
Height: 2’ – 9’ Random
Thickness: ¾” – 1 ½”
Yield: 10-15 lbs per sq. ft.

CASTLE CUT

Castle Cut
Length: 4” – 24’ Random
Height: 4” – 12’ Random
Thickness: ¾” – 1 ½”
Yield: 10-15 lbs per sq. ft.

DIMENSIONAL CUT

Dimensional Cut
Length: 4” – 30’ Random
Height: Sawn 2 ½”, 5”, & 7 ¾”
Thickness: ¾” – 1 ½”
Yield: 10-15 lbs per sq. ft.

DIMENSIONAL DRYSTACK

Dimensional Drystack
Length: 4” – 30’ Random
Height: Sawn 2’, 4’ & 6’
Thickness: ¾” – 1 ½”
Yield: 10-15 lbs per sq. ft.

LEDGESTONE

Ledgestone
Length: 4” – 16’ Random
Height: 1’ to 3’ Random Sawn & Natural
Thickness: ¾” – 1 ½”
Yield: 10-15 lb per sq. ft.

MOSAIC CUT

Mosaic Cut
Length: 6” – 16’ Irregular
Height: 6” – 16’ Irregular
Thickness: ¾” – 1 ½”
Yield: 10-15 lbs per sq. ft.

RUSTIC CUT

Rustic Cut
Length 4” – 30’ Random
Height: 2’ – 9’ Random
Thickness: ¾” – 1 ½”
Yield: 10-15 lb / sq ft.

SAWN DIMENSIONAL

Sawn Dimensional
Length: 4” – 30’ Random
Height: Sawn 5’
Thickness: ¾” – 1 ¼”
Yield: 10-15 lb per sq. ft.
