NATURAL THIN STONE VENEER
KAFKA GRANITE’S NATURAL THIN STONE VENEER

is derived from our various quarries throughout North America and made with the same care and attention to detail as other Kafka products. This extensive line of Thin Stone Veneer is comprised of stunning natural stone that can be used for nearly any application, spanning from building facades to interior features.
A DECADENT DESIGN SOLUTION FOR PROJECTS OF ANY SIZE.

From modest residential projects to large-scale commercial properties—and everything in between—Kafka Granite Thin Stone Veneer delivers a lifetime of beauty and durability.

Masonry by: Firkus Masonry
BECAUSE KAFKA ONLY PRODUCES AUTHENTIC STONE PRODUCT,

the natural colors of our granite, quartzite, and marble exist through the entire stone. Kafka’s Natural Thin Stone Veneer wears and weathers naturally and maintains its integrity through the life of your project.
A DIVERSE AND EXCLUSIVE RANGE OF GRANITE, MARBLE, AND QUARTZITE in both classic and unique colors offers an array of appealing options to architects, masons, and property owners alike for commercial and residential applications.
NOT ALL STONE IS CREATED EQUAL.

Kafka Granite delivers some of North America’s most spectacular natural stone from the earth’s surface to dream homes and commercial properties, expertly handcrafted in the United States.
THE LIGHTWEIGHT PIECES HELP REDUCE PRODUCTION, SHIPPING, AND CONSTRUCTION COSTS.

With a nominal thickness of $\frac{3}{4}$" to 1 ½" the natural stone product weighs 15lbs or less per square foot. Kafka Natural Thin Stone Veneer can be installed without footings or ledges and adheres to concrete, plywood, paneling, drywall, and even metal.
To ensure the integrity and longevity of a project, we recommend that a professional mason install our natural thin stone veneer. If this specialty building product is being utilized in an exterior project, the area that will be in contact with the product must first be waterproofed to industry standards. Next, any chemical film on the wall should be removed. Additional surface preparation may be necessary, depending on the type of material. Some surfaces will need a non-corrosive wire lath and a setting mix before the material is applied. To set the product, begin with any corner pieces and alternate long and short ends while stacking them on top of each other. Type N or S mortar is suitable for most projects, possibly with the addition of a bonding admixture. Once the corners are complete, the rest of the pattern can be filled in by pressing each stone against the scratch coat wall. Mortar should be allowed to ooze and create grout joints around the edge of each stone.
**SPECIFICATIONS**

**ASHLAR CUT**
- Length: 4’ – 30’ Random
- Height: 2’ – 9’ Random
- Thickness: ¾’ – 1 ½’
- Yield: 10-15 lbs per sq. ft.

**CASTLE CUT**
- Length: 4’ – 24’ Random
- Height: 4’ – 12’ Random
- Thickness: ¾’ – 1 ½’
- Yield: 10-15 lbs per sq. ft.

**DIMENSIONAL CUT**
- Length: 4’ – 30’ Random
- Height: Sawn 2¼”, 5”, & 7 ¾”
- Thickness: ¾’ – 1 ½’
- Yield: 10-15 lbs per sq. ft.

**DIMENSIONAL DRYSTACK**
- Length: 4’ – 30’ Random
- Height: Sawn 2”, 4” & 6”
- Thickness: ¾’ – 1 ½’
- Yield: 10-15 lbs per sq. ft.

**LEDGESTONE**
- Length: 4” – 16” Random
- Height: 1” – 3” Random Sawn & Natural
- Thickness: ¾’ – 1 ½’
- Yield: 10-15 lbs per sq. ft.

**MOSAIC CUT**
- Length: 6” – 16” Irregular
- Height: 6” – 16” Irregular
- Thickness: ¾’ – 1 ½’
- Yield: 10-15 lbs per sq. ft.

**RUSTIC CUT**
- Length: 4” – 30’ Random
- Height: 2” – 9’ Random
- Thickness: ¾’ – 1 ½’
- Yield: 10-15 lbs per sq. ft.

**SAWN DIMENSIONAL**
- Length: 4’ – 30’ Random
- Height: Sawn 5’
- Thickness: ¾’ – 1 ½’
- Yield: 10-15 lbs per sq. ft.

**WISCONSIN FIELDSTONE**
- Size: Assorted Diameters 5” – 12”
- Thickness: ¾’ – 1 ½’
- Yield: 10-15 lbs per sq. ft.
